

1W isolated DC-DC with Fixed Input Voltage;
unregulated Single Output

FEATURES

- Continuous short-circuit protection
- High efficiency up to 80%
- Operating ambient temperature -40°C to +105°C
- Compact SIP/DIP package
- Industry standard pin-out
- I/O isolation test voltage 1.5k VDC
- IEC60950, UL60950, EN60950 approval

B_S-1WR2 & B-D-1WR2 series is designed for use in distributed power supply systems and especially suitable in applications such as pure digital circuits, low frequency analog circuits, relay-driven circuits and data switching circuits, where:

1. The voltage of the input power supply is relatively stable with a variation of $\pm 10\%$ Vin or less;
2. An input to output isolation voltage of up to 1500VDC is necessary;
3. The requirement for a tight output regulation and low ripple & noise is not as strict.

Design Reference

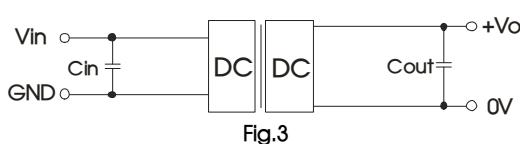

1. Typical application

Input and/or output ripple can be further reduced, by connecting a filter capacitor from the input and/or output terminals to ground as shown in Fig.3.

Choosing suitable filter capacitor values is very important for a smooth operation of the modules, particularly to avoid start-up problems caused by capacitor values that are too high. For recommended input and output capacitor values refer to Table 1.

Table 1: Recommended input and output capacitor values

Vin(VDC)	Cin(µF)	Vo (VDC)	Cout(µF)
3.3/5	4.7	3.3/5	10
12	2.2	9	4.7
15	2.2	12	2.2
24	1	15	1
--	--	24	0.47

2. EMC (CLASS B) compliance circuit

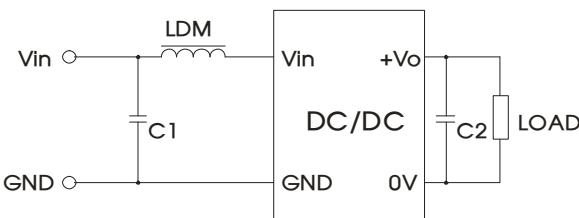

Fig. 4

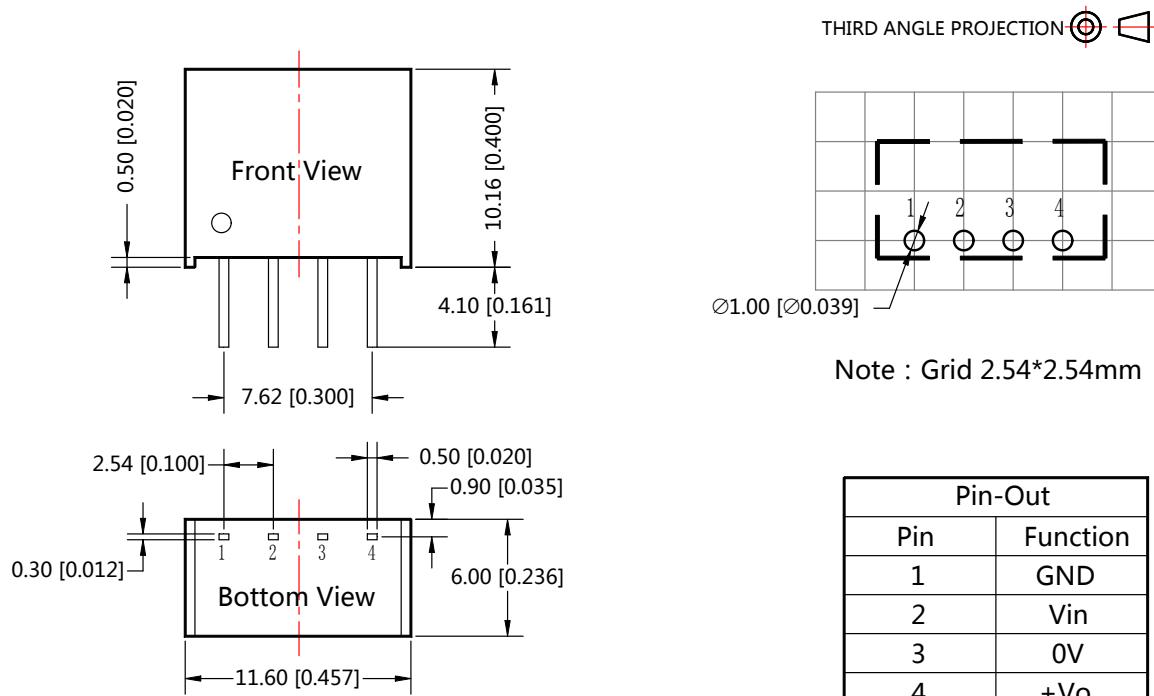

Input voltage (VDC)		3.3/5/12/15/24
EMI	C1	4.7μF /50V
	C2	Refer to the Cout in Fig.3
	LDM	6.8μH

3. Minimum Output Load Requirement

For a reliable and efficient operation of the converter, the minimum load should never be less than 10% of the rated output load. If the total required output power is below 10%, a parallel bleeding resistor is required on the output, ensuring that the sum of the power consumption is always maintained at 10% minimum.

- For additional information on Product Packaging please refer to www.mornsun-power.com. Packaging bag number: 58200003(B_S-1WR2), 58200011(B_D-1WR2);
- In order to guarantee product performance and datasheet compliance, the product must be operated within specifications and load range requirement;
- The specified maximum capacitive load is tested under full load condition and over the input voltage range;
- All parameters in this datasheet were measured under following conditions: Ta=25 °C , relative humidity<75%RH, nominal input voltage and rated output load (unless otherwise specified);
- All index testing methods in this datasheet are based on our corporate Company standards;
- For special requirements and customization service, please contact your nearest MORNUSN sales representative or one of our technicians;
- Products are related to laws and regulations: see "Features" and "EMC";
- Our products shall be handled according to ISO14001 and related environmental laws and regulations by qualified personnel only.
